Re Report of SA [redacted] dated 12/22/71
at Boston.

Enclosed for the Bureau are ten copies and for
each recipient office, two copies of LHM dated and
captioned as above.

Also enclosed for Boston is one each of the May
1972 issue of "Science for the People", "Science for Vietn
Newsletter" and a document entitled, "Science for Vietnam
- Who We Are and What We Do".

The LHM is classified ~~Secret~~, No Foreign Dissemination
No Dissemination Abroad, since information relating to [redacted]
[redacted] as furnished by [redacted] was so classified.

The source utilized in the LHM are as follows:

[redacted]

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED
DATE 3-5-96 BY SP4B SA/LOK

All other sources are persons in a position to know

SCIENTISTS AND ENGINEERS FOR SOCIAL
AND POLITICAL ACTION (SESPA)

On October 4, 1971, a source who has furnished reliable information in the past, provided a copy of an article entitled, "Science For Vietnam" which was distributed at the SESPA Office, 9 Walden Street, Jamaica Plain, Massachusetts and stated in part:

"The Science for Vietnam project is one way in which scientists can give practical as well as symbolic meaning to a people-to-people peace with Vietnam. It is a start of reparations to a country that is being devasted in our name. By openly collaborating with those whom our Government calls the enemy, it dissociates us from the war and serves notice that we are looking for new ways of resisting...

"The Science For Vietnam project grew out of a visit to Hanoi in December, 1970, by Richard Levins as part of a delegation of western scientists sponsored by the World Federation of Scientific Workers."

S/ [REDACTED]

In August, 1951, a second source who has furnished reliable information in the past, advised that [REDACTED] and [REDACTED] [REDACTED] admitted that they were formerly members of the Communist Party, United States of America (CP USA) in the United States; and they assumed an active part in the affairs of the CP of Puerto Rico.

b6
b7c

World Federation of Scientific Workers (WFSW)

Cited as "another international Communist front organization which seeks to win scientists to the Communist cause. (Committee on Un-American Activities, House Report 378 on the Communist Peace Offensive, April 25, 1951, originally released on April 1, 1951, page 83).

On May 29, 1972, a third source who is in a position to furnish reliable information advised as follows:

On May 24, 1972, an unmarked piece of luggage arrived at the International Airport, Salt Lake City, Utah, during the period from 9 PM to 9:30 PM. Inspection of the luggage by airline personnel failed to disclose the owner's identity or the airline flight on which the luggage had arrived. Six flights of various origins arrived at International Airport during the half hour period mentioned above.

The third source mentioned above, advised that this luggage in addition to items of clothing contained a number of packets and miscellaneous items addressed to persons or organizations in North Vietnam. Among this material was the following:

b6
b7C

Dear [redacted]

We are sending this packet of materials on Differential Dynamical Systems, a study of the topological solution of systems of differential equations, as part of our work on the Science for Vietnam project. [redacted]

suggested that you might be interested in this field.

Our purpose in preparing this packet was to ourselves begin to struggle with the problem of finding ways of doing mathematics that will help people. Our experience with our professors has been that most of them view mathematics as something to do for its own sake and that those who do mathematics are somehow an elite. This question of what good is mathematics is especially difficult for those of us in the various fields of topology. Two other problems that we have had to deal with are 1) where is mathematics going and what is it that we have already done? and 2) how can mathematicians communicate to the average person what is worth knowing about mathematics so that they can understand technology and not rely on the words of "experts" without themselves becoming experts.

The following few paragraphs describe the nature of the material of this packet. References are to the enclosed bibliography. We have attempted to provide an introduction to the subject of differential dynamical systems. A historical definition of the subject can be found in the introduction to the Zeeman article (20).

Since we could not tell from [redacted] what resources you have available, we have included Milnor (6) and Lang (5) as background material on manifolds. Milnor's paper provides an introduction to differentiable manifolds. Lang generalizes from the finite dimensional manifolds discussed in Milnor to the infinite dimensional manifolds which arise, for example, when one studies the collection of all first order differential equations on a finite dimensional manifold.

The article (12) and (11) by Smale introduce his definitions, theorems and examples, and survey the general subject of differentiable dynamical systems. Nitecki (7) also surveys the work of Smale and gives many details on the techniques required to prove Smale's theorems. Chapter One of Nitecki, entitled "Flows and Diffeomorphisms", indicates why much of the recent work on dynamical systems deals with discrete dynamical systems (diffeomorphisms) rather than with continuous dynamical systems (flows). Both Smale (11) and Nitecki contain extensive bibliographies. If you would like copies of any articles mentioned there or elsewhere, we would be glad to send them to you.

~~SECRET - NO FOREIGN
DISSEMINATION, NO
DISSEMINATION ABROAD~~

The research papers (13), (1), (8), (4), (3), (9), (10), (16), (18) deal with further aspects of Smale's main point, the stability of dynamical systems. These papers deal with such questions as how many dynamical systems on a finite dimensional manifold possess various kinds of stability. The bibliography (21) deals with stability questions for systems with an infinite number of degrees of freedom.

Thom (19) suggests that structural stability may be useful in conceptualizing biological problems. Zeeman (20), giving an introduction to the above-mentioned work of Smale and Thom, contrasts structurally stable dynamical systems with the Hamiltonian systems of classical mechanics. He shows that Hamiltonian systems are not structurally stable and argues that structurally stable dynamical systems are qualitatively the simplest dynamical systems.

Finally Smale talks about classical mechanics in (14), (15), and about electrical circuit theory in (17). The book (2) by Avez and Arnold deals with measure theoretic concepts (ergodicity) in relation to classical mechanics.

Demonstrations are proceeding here against the recent US escalations. We wish you all the best of luck.

fraternally,

Science for Vietnam, Madison Collective.

This letter was sent to the Chicago
Collective, Science for Viet Nam to
be forwarded to you -

5/1/72

~~SECRET - NO FOREIGN
DISSEMINATION, NO
DISSEMINATION ABROAD~~

Brothers and Sisters,

received your letter enclosing the information
on geophysical warfare, and released the press release to the
Washington Post on April 24. We have been working on our
meteorology for Vietnam aspect and have compiled a collection
of articles on the construction of a weather satellite transmission
receiving station, for use with U.S. weather satellites. This
collection is enclosed, and we hope that our Vietnamese brothers
and sisters can make good use of the information. If they want
more, I'm sure we can assist them.

b6
b7c

The following items are enclosed:

- 1 copy, "Reception of Pictures from the Weather Satellites
Using Homemade Equipment," The Physics Teacher, Vol. 7,
Nos. 4 and 5 (2 parts)
- 1 copy, "Birds-eye view of the weather", Electronics, July 27, 1964
- 1 copy, "Tracking and recording satellite transmissions", Ham
Radio, November 1968.
- 1 copy, "Amateur Reception of Weather Satellite Picture Transmissions",
and "Evolution of an Amateur Weather-Satellite Picture
Station", QST, November 1965 and April 1968.
- 1 copy, ESSA Direct Transmission System Users Guide, 1969 edition.
- 1 copy, Application of Meteorological Satellite Data in Analysis
and Forecasting, U. S. Dept. of Commerce, Sept. 1969.
- 1 copy, NASA SP-5079 "Constructing Inexpensive Automatic Picture-
Transmission Ground Stations", 1968.

1 copy, NASA SP-5080, "Weather Satellite Picture Receiving
Stations, 1969.

1 copy, "Satellite Tracking and Orbital Predict Information",

In view of the recent increase in fighting and bombing in
Vietnam, it may be that this information is not of much use in
predicting instances of geophysical warfare. However, it will
be of considerable use for forecasting days when the U. S. bombing
missions will be at a low level because of bad weather.

In the struggle,

3. A packet of material addressed to the Commission for the Investigation of Crimes of War, Hanoi and DRVN. The folder of this packet describes the material therein as relating to American culture or exemplifying it in some way. Among the items in this packet were articles taken from "Liberation Magazine", "Ramparts", "Saturday Review", as well as complete issues of "The Black Panther Party", "The Militant" and two issues of "Consumer Reports" bearing an address label of [REDACTED], Chicago, Illinois.

b6
b7c

"LIBERATION" MAGAZINE

"Liberation" Magazine, an independent monthly, is published in New York City. Since its inception in 1956, it has printed "anti-establishment" articles written by individuals supporting worldwide communism, black militants, and New Left radicals. Dave Dellinger, leading figure in the New Left movement is the Editor.

"THE BLACK PANTHER PARTY"

"The Black Panther Party" is the official publication of the Black Panther Party.

The Black Panther Party (BPP) is a black extremist organization started in Oakland, California, in December, 1966. It advocates the use of guns and guerrilla tactics to bring about the overthrow of the United States Government.

~~SECRET - NO FOREIGN

DISSEMINATION ABROAD~~

SCIENTISTS AND ENGINEERS FOR SOCIAL
AND POLITICAL ACTION (SESPA)

~~SECRET - NO FOREIGN
DISSEMINATION, NO
DISSEMINATION ABROAD~~

"THE MILITANT"

"The Militant" is the weekly newspaper
of the Socialist Workers Party (SWP).

The SWP has been designated pursuant to
Executive Order 10450.

4. A packet addressed to the Commission for the
Investigation of Crimes of War, Hanoi and DRVN. A note
found in this packet states "these four folders contain
materials clipped from "Time" magazine. We sent them in
response to your request for cultural material on the
U.S. and information on Indochina from any source. As you
may know, "Time" magazine is one of the major news organs
of the American Establishment. There is no clearer warning."

The articles contained in the four folders mentioned
above concerned the following topics:

- a. articles relating to American cultural and
internal affairs
- b. articles about other countries other
than Vietnam and Indochina
- c. articles relating to the war in
Indochina
- d. typical advertisement in "Time"

Also included in this packet was a copy of the June
28, 1971 issue of "Time" magazine bearing an address label
of ,
Chicago, Illinois.

5. A packet addressed to the University of Hanoi, Department of Biology from the University of Chicago, Scientists for Vietnam, Collective containing the published scientific papers of Biologist Dr. Clyde Goulden at the Philadelphia Academy of Natural Sciences in Philadelphia, Pennsylvania. These papers covered Goulden's research with semi-fossil freshwater cladocerans.

6. A packet addressed to the DRVN Commission for Investigation of US Crimes of War, Hanoi, from the Science for Vietnam Collective, Madison, Wisconsin.

A notation on this packet states that the packet contains "material related to cultural and political events in the USA for use by the commission or other interested groups, such as the Committee for Solidarity with the American People.

This packet contains the following items:

a. The Spring, 1971 issue of "Liberation" magazine bearing the address label of [redacted], Wisconsin.

b. "I. F. Stone's Bi-weekly", issues of December 14, 1970, March 8, 1971, April 19, 1971, May 3, 1971, and September 6, 1971, all bearing address labels of [redacted], Wisconsin.

b6
b7c

c. Various articles concerning Vietnam taken from "Liberation", "Science", "The Progressive" and "The New York Review on Books".

7. A packet captioned Department of Biology, University of Hanoi, which bore the inscription "This packet is part of a series on population biology prepared by the Chicago Collective of Science for Vietnam in response to requests received by [redacted] in Hanoi in December, 1970, In Solidarity."

SCIENTISTS AND ENGINEERS FOR SOCIAL
AND POLITICAL ACTION (SESPA)

~~SECRET - NO FOREIGN
DISSEMINATION, NO
DISSEMINATION ABROAD~~

The contents of this packet were articles which had been previously published in "Zoology", "American Naturalist", "Ecology" and "Proceedings of the National Academy of Sciences".

8. A packet captioned "BAC MAI Hospital, Hanoi" from the Minneapolis Collective Science for Vietnam. This packet contained articles principally devoted to xeroradiography which were published in "Radiologic Clinics of North America", "Radiology", "Cancer", and "Geriatrics".

9. A packet addressed to "Department of Biology University of Hanoi," which bore the following inscription: "This packet is part of a series on population biology prepared by the Chicago Collective of Science for Vietnam in response to requests received by [redacted] in December, 1970.

b6
b7c

This packet contains articles previously published in "Evolution", "The American Naturalist", "Proceedings of the National Academy of Sciences", "Ecology" and "The Quarterly Review of Biology". Many of these articles were concerned with island biogeography.

In addition to the packets mentioned above the following miscellaneous items were contained in this luggage:

1. "A preliminary report on the use and potential of geophysical warfare in the US", prepared by the Chicago Collective of Science for Vietnam. The first page of this report bore the inscription "To Col. Ha Van Lu, War Crimes Commission - In Solidarity, Chicago Collective Science for Vietnam, 1103 East 57th Street, Chicago, Illinois."

[REDACTED]

[REDACTED]

[REDACTED]
[REDACTED] Chicago, Illinois is a graduate student
in the Biology Department.

The following additional information is noted:

[REDACTED]

The 1971-72 Northwestern University
student directory contains a listing for

[REDACTED],
Illinois.

b6
b7c

[REDACTED]

On February 7, 1972, another government agency
which conducts security investigation in the
Chicago area, advised that [REDACTED] is a
member of the New University Conference (NUC) and
a graduate student in Physics at the University of
Chicago.

New University Conference

A pamphlet distributed by the NUC in
December, 1970, states that it is a national
organization of graduate students, faculty and
staff, whose members are "radicals committed
to the growth of a revolutionary socialist
movement in the United States." NUC maintains
a national office at 622 West Diversey, Chicago,
Illinois.

I//

[redacted]

On May 14, 1969, a fifth source who has furnished reliable information in the past, advised that [redacted] [redacted] entered the University of Chicago in 1965 and was studying in the field of social sciences. His permanent home address is shown as [redacted], New Jersey.

b6
b7c

[redacted]

In October, 1970, a sixth source who has furnished reliable information in the past, advised that [redacted] [redacted], Chicago, Illinois, University of Chicago, had registered for the Midwest Conference of the Students for a Democratic Society/ (SDS) Worker Student Alliance (WSA) held at the University of Chicago, September 25-27, 1970.

SDS

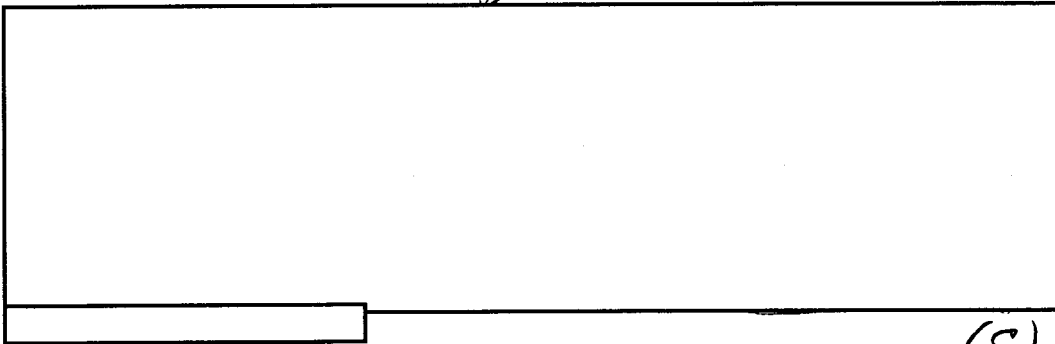

SDS was founded during June, 1962, at Port Huron, Michigan, and in the 1960s functioned as the leading New Left campus-based student organization in the US. From an initial posture of "participatory democracy," SDS moved to a radical-revolutionary position, with debate centering on how best to create a revolutionary youth movement. Internal factionalism produced a split during the SDS National Convention in June, 1969, which resulted in the following three factions: Weatherman; Worker Student Alliance (WSA); and Revolutionary Youth Movement (RYM). The Weatherman and RYM are no longer affiliated with SDS. The WSA continues to use the name SDS and maintains its national headquarters in Chicago, Illinois.

~~SECRET - NO FOREIGN
DISSEMINATION, NO
DISSEMINATION ABROAD~~

Weatherman, formerly a faction of SDS controlled the SDS National Office from June, 1969, until its closing in February, 1970. Weatherman then entered an underground status and adopted a tactic of "strategic sabotage" with police and military installations designated as primary targets.

Worker Student Alliance (WSA), a faction of SDS was expelled from SDS in June, 1969, by the then dominant Weatherman faction but continued to use the name SDS and opened an office in Boston, Massachusetts. WSA aligned ideologically with the Progressive Labor Party, (PLP) and in February 1971, moved to Chicago, Illinois. SDS/WSA currently shares office space with the PLP in Chicago.

The Progressive Labor Party (PLP) was founded in 1962 by individuals expelled from the Communist Party, USA, for following the Chinese communist line. Its objective is the establishment of a militant working-class movement based on Marxism-Leninism and MAO Tse-tung thought.

TO: COMMITTEE FOR SOLIDARITY WITH THE AMERICAN PEOPLE.

Friends . . .

The Whole Earth Catalog is both a cultural phenomenon in the United States, and a guide to useful books and materials. The first edition appeared several years ago and quickly became a best-seller among people who were looking for alternative life styles; among other things, the Catalog tells how to gather information on organic gardening, house-building, crafts, machines--material people need if they are trying to break from the plasticized, mass-produced living materials of modern America. There is no advertising in the catalog, most of the suggestions for what to include came from readers who had tested out the items themselves.

This is the last Whole Earth Catalog that will be published. We're sending it to you in the hope that it will be, first of all, interesting for you. But more importantly, it may give you some idea of the types of books and materials that we have access to. We can't guarantee that we'd be able to get anything you ask for, but we'd be willing to try!
