UNITED STATES MEDICAL AID
COMMITTEE FOR INDOCHINA

In March, 1972, a source, who has provided reliable information in the past, made available "Science For The People", Volume 4, Number 2, March, 1972, a bi-monthly publication of Scientists and Engineers for Social and Political Action (SESPA). Page 21 of the publication contains an advertisement soliciting support and donations for the Medical Aid Committee for Indochina, 474 Centre Street, Newton, Massachusetts, 02158, a copy of which is attached.

In September, 1971, this same source advised that the national magazine "Science For The People" is published bi-monthly at 9 Walden Street, Jamaica Plain, Boston, Massachusetts by "The Editorial Collective", a small group of members of SESPA in the Boston Metropolitan area, who rotate with each issue.

In November, 1971, this same source advised that SESPA is a national organization of persons involved in scientific or engineering fields; SESPA is a loosely-knit national group which organizes in chapters located in various United States cities; each chapter has its own name and operates independently from other chapters. SESPA produces its own national magazine known as "Science For The People".

In December, 1971, this same source advised that SESPA, on a national basis, participates in three types of activities:

1. Publication of its national magazine

ea underlying the New Math has been to teach
tance and methodology (rigorous proof) thought
for testing novel propositions' validity. Even
and methodology are appropriate at the fron-
ollow that they are an appropriate way to

relate to an established body of knowledge?

How much of mathematical research can be called
productive labor? Bellman calls it a criminal waste of
resources to train algebraic topologists. Maybe some activ-
ities intolerably wasteful in Vietnam are justifiable here;
and conversely. Then too—in our society where much
production (especially the "advanced" sort) goes to destruc-
tive ends, do we want to work productively? If so, why,
and how? If not, why should we accept high salaries? If
we forego high salaries, and hence choose our labor unin-
fluenced by university standards, will we then be able to
think of really useful work to do? Will it be mathematics?

C.D.

MEDICAL AID COMMITTEE FOR INDOCHINA

The Medical Aid Committee for Indochina is collecting funds to purchase medical supplies for victims of American intervention in SE Asia. Official US medical relief programs are not reaching the people who have suffered from the continuing war. Instead, medicine and other supplies have been used for military purposes, including pacification and propaganda programs. Moreover, the few medical programs intended for civilians rarely benefit them because of administrative bureaucracy and corruption.

Therefore, all help sent by the Medical Aid Committee will be directed to those people who are outside the sphere of official US medical aid. We will utilize all available channels to insure that medical supplies will be distributed to those areas of North Vietnam, southern Vietnam, Laos and Cambodia where the need is greatest.

Funds will be utilized for purchase of 1) medical supplies (anti-malarial drugs, antibiotics, vitamins, etc.), 2) medical equipment as requested by hospitals, and 3) medical textbooks and journals.

The people of Indochina are not our enemies. Their civilization and culture, their freedom and independence are part of the wealth of this earth. The immediate and total withdrawal of all US (and US supported) forces and weapons from SE Asia is essential to their survival. One way we can actively oppose administration policies of death and destruction is to send medical supplies to the victims of this aggression.

Please send donations to:
